NEW: OUR LARGEST MANTEL

FARMHOUSE

Our Farmhouse Mantel pays tribute to the hewn log houses of pioneer homesteaders in Kentucky. Imagine this massive, reclaimed timber being used in the wall of an old log home.

It has beautiful broad ax tooling marks and the remnants of mortice & tenon joinery running vertically through the left end of the mantel. The oak woodgrain is exceptionally tight suggesting that it came from a first-growth forest when it was cut.

6’ LONG 205 LBS

7’ LONG 235 LBS
